

Nanomagnetism and Spintronics: Fabrication, Materials, Characterization and Applications

Filesize: 8.75 MB

Reviews

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who statte that there had not been a worth looking at. You wont really feel monotony at at any moment of your own time (that's what catalogs are for about should you request me).

To read **Nanomagnetism and Spintronics: Fabrication, Materials, Characterization and Applications** PDF, you should refer to the button below and download the ebook or have access to other information which might be related to NANOMAGNETISM AND SPINTRONICS: FABRICATION, MATERIALS, CHARACTERIZATION AND APPLICATIONS book.

World Scientific Publishing Co Pte Ltd. Hardback. Condition: new. BRAND NEW, Nanomagnetism and Spintronics: Fabrication, Materials, Characterization and Applications, Farzad Nasirpour, Alain Nogaret, Nanomagnetism and spintronics are two close subfields of nanoscience, explaining the effect of substantial magnetic properties of matter when the materials fabrication is realized at a comparable length size. Nanomagnetism deals with the magnetic phenomena specific to the structures having dimensions in the submicron range. The fact that the electronic transport properties of materials are dependent on the magnetic properties' artificial nanostructures, i.e., giant magnetoresistance (GMR) or tunneling magnetoresistance (TMR), has revolutionized spintronics science and technology. This book explains the concepts of nanomagnetism and spintronics by viewing the most recent research works from internationally distinguished research groups. Placing special emphasis on crucial fundamental and technical aspects of nanomagnetism and spintronics, it serves as a one-stop reference for universities offering postgraduate programs in nanotechnology or related disciplines. This unique book deals with all three stages required for conducting research in nanomagnetism and spintronics including fabrication, characterization and applications of nanomagnetic and spintronics materials, providing general concepts and an insightful overview of this subject for research students and scientists from different backgrounds investigating the multidisciplinary area of nanotechnology.
