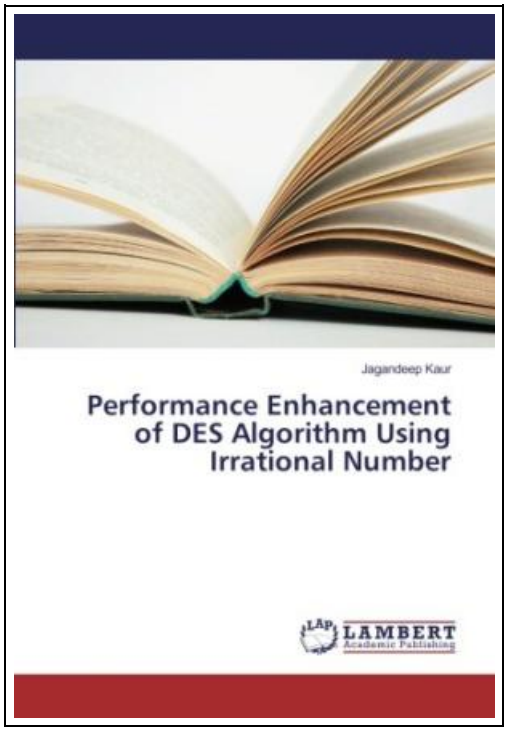
Performance Enhancement of DES Algorithm Using Irrational Number



Filesize: 4.07 MB

Reviews

This book is great. it absolutely was writtern quite properly and beneficial. Its been written in an extremely basic way and it is merely after i finished reading through this ebook in which basically changed me, affect the way i really believe.
(Leopold Schmidt)

PERFORMANCE ENHANCEMENT OF DES ALGORITHM USING IRRATIONAL NUMBER

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Security is a main concern in information and data systems of all types. Data Encryption Standard is one of cryptographic algorithm that provides security. Multiple DES provides additional cryptographic strength to DES by using more than a single key. Every time same plaintext is encrypted with the same key, same cipher text is obtained with standard and multiple DES. Time taken by Double and Triple DES is double, triple respectively to that of standard DES. This dissertation work is focused on enhancing the performance of standard DES in terms of security of generated cipher text by increasing the key space by using an irrational number PI generated by super PI software and provides different cipher text every time for the same plaintext using the same key without costing any more time to run. | Format: Paperback | Language/Sprache: english | 60 pp.
