## MODERN GROUP ANALYSIS: ADVANCED ANALYTICAL AND COMPUTATIONAL METHODS IN MATHEMATICAL PHYSICS

[DOWNLOAD PDF](#)

To download **Modern Group Analysis: Advanced Analytical and Computational Methods in Mathematical Physics** PDF, make sure you refer to the web link beneath and save the document or get access to additional information which are highly relevant to MODERN GROUP ANALYSIS: ADVANCED ANALYTICAL AND COMPUTATIONAL METHODS IN MATHEMATICAL PHYSICS ebook.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of the International Workshop Acireale, Catania, Italy, October 27-31, 1992 | Proceedings of the International Workshop, Acireale, Catania, Italy, October 27--31, 1992 | On the occasion of the 150th anniversary of Sophus Lie, an International Work shop "Modern Group Analysis: advanced analytical and computational methods in mathematical physics" has been organized in Acireale (Catania, Sicily, October 27 31, 1992). The Workshop was aimed to enlighten the present state of this rapidly expanding branch of applied mathematics. Main topics of the Conference were: - classical Lie groups applied for constructing invariant solutions and conservation laws; - conditional (partial) symmetries; - Bäcklund transformations; - approximate symmetries; - group analysis of finite-difference equations; - problems of group classification; - software packages in group analysis. The success of the Workshop was due to the participation of many experts in Group Analysis from different countries. This book consists of selected papers presented at the Workshop. We would like to thank the Scientific Committee for the generous support of recommending invited lectures and selecting the papers for this volume, as well as the members of the Organizing Committee for their help. The Workshop was made possible by the financial support of several sponsors that are listed below. It is also a pleasure to thank our colleague Enrico Gregorio for his invaluable help of this volume. | Hidden and nonlocal symmetries of nonlinear differential equations. Internal symmetries of differential equations. Examples of completely integrable Bateman pairs. Group method analysis of the dispersion of gaseous pollutants in the presence of a temperature inversion. Conformal invariance, Huygens principle and fundamental solutions for scalar second order hyperbolic equations. Potential symmetries and equivalent conservation laws. Some remarks on a class of ordinary differential equations: the Riccati property. Differential-algebraic and differential-geometric approach to the study...
