Not illustrated. 1874 Excerpt: .permit, by the use of fans and ice chambers, a cool atmosphere can be produced in summer. It would be supposed that such comfort in heating would spread with rapidity through all the cold and temperate climates, but such has not been the case, for, outside of the United States and England, the progress has been slow. In most of the cities of Europe, and, indeed, throughout the continent, the people cling tenaciously to the old style of fire stoves for burning wood or coal, which, although the heat yielded is pleasant, is very cumbrous and expensive. In parts of Europe and Asia, where it would be supposed that means of heating are very requisite, scarcely any attention is paid to a subject so important. In Spain and Italy, until quite recently, no preparation would be made for heating in winter, except a dish of burning charcoal placed in the centre of the tile-floor of a room. Such floors, although admirable for their safety from fire, certainly make an unheated chamber much more cheerless. In fact, it is strange how little, throughout all Europe, except among the wealthy, the health and comfort arising from properly heated apartments is regarded. In Russia and other very cold countries (and not including the half-civilized Esquimaux and Laplanders), where some heat must be maintained in winter to prevent freezing to death, the mass of people frequently use a large oven with a flat top, and heated at an opening outside...
